

AYAAN AHMAD

Atlanta, GA | (470) 796-3005 | ayaanzahmad@gmail.com
ayaanahmad.org | github.com/ayaanahmad | linkedin.com/in/ayaan-ahmad-071673321

Computer Science student with experience in software development, AI evaluation, systems administration, and operations. Builds practical automations, administers a Cisco virtualization lab, and translates business and compliance requirements into clear workflows.

EDUCATION

Georgia State University - B.S. Computer Science, Minor in Economics | Expected May 2028

GPA: 3.76 | Dean's List: Spring & Fall 2025 | Coursework: Data Structures, Database Systems, Discrete Mathematics, Logic & Computation, Econometrics

TECHNICAL & PROFESSIONAL SKILLS

Development: Python, JavaScript/TypeScript, Go, Java, SQL/Postgres, React, Next.js, REST APIs, Git

Systems: Linux, Windows, Active Directory, DNS, VMware ESXi/vCenter, Cisco CIMC/UCS, Docker

Cloud & operations: Firebase, Google Cloud, Microsoft 365, process documentation, compliance workflows, team coordination, AI evaluation and automated verification

EXPERIENCE

Meticulous Health Solutions | Chief Operating Officer | May 2026 - Present

- Designed and documented 50+ administrative and compliance workflows covering referral intake, onboarding, record retention, workforce screening, and audit evidence across four Georgia counties.
- Helped reduce onboarding and documentation cycles from roughly two months to 14 days by translating requirements into repeatable procedures, forms, and operational systems.

Cenvi | Director of Operations / Full-Stack Development | May 2025 - Present

- Coordinate technical and operational delivery with a 12-person team, connecting product requirements, organizer onboarding, payment processes, CRM workflows, and client communication.
- Supported an event-technology platform with 20,000+ ticket sales and \$372K+ in transactions across Atlanta, New York, and Texas.

Handshake AI | AI Trainer, Contract | May 2026 - Aug 2026

- Designed programming tasks for Project Dynamo, including specifications, reference solutions, and automated verification using Python, C, Docker, and Linux.

Oakwin | Software Engineering Intern | Aug 2025 - Jan 2026

- Built Python SaaS automations and backend integrations across REST APIs, data processing, and LLM-based content workflows; translated requirements into testable behavior in a multitenant environment.

Cabbage Soup | Software Development Intern | Aug 2023 - May 2024

- Developed Python automation and explored AI/LLM pipelines, building experience in debugging and iterative software delivery.

SELECTED PROJECTS

Cisco Virtualization & Systems Lab | Self-directed | Mar 2022 - Present

- Built and administer a Cisco server with 48 CPU cores, 380 GB RAM, and 4 TB storage. Manage VMware ESXi/vCenter, Linux and Windows environments, Active Directory, DNS, and Cisco CIMC; explore local AI workloads.

Jarvis Embedded AI Assistant | Self-directed | 2024 - Present

- Combine Raspberry Pi, Python, voice/LLM workflows, and Home Assistant with hands-on electronics, soldering, and software-hardware troubleshooting.

LEADERSHIP

MIST - Competitions Lead / Board Member | Aug 2024 - Jul 2025

Coordinated schedules, judges, check-in, scoring, and logistics for 800+ participants with approximately 50 volunteers and organizers. Additional experience teaching at GIC and tutoring through Rooh Review.
